INDUSTRY

select box according to industry in which
you operate and utilised solutions

important questions:

to order a box optimal for your products

- Do you present your product among competition and does the box have to stand out?
- Do you place product inside the box loose or should it be stabilised and presented by putting in foam/sponge?
- Will your products be shipped and transported and does the box have to be durable?
- What emotions should your box arouse and how should it refer to products inside of it: you can arise admiration from the first touch by using e.g. fabric or velvet veneer with beautiful embossing or present your Company as eco-friendly and communicate its values already on the box stage.
- Do your product create series or collections and is it worth to make the communication form uniform and create characteristic lines of boxes?

size and shape

the box's format depends on the shape of products inside of it

At MILO, each box is created on the individual order and is completely customised to fit the size and nature of your brand's products.

Show us your products and tell about your expectations and we will present a whole range of solutions completed with suggestion, which form will be the most optimal for your brand.

It is an important planning stage and we are perfectly aware that you do not have this answer at the initial stage. Therefore, here at MILO you can test, check, and choose in our Prototype Studio!

box filling

present and transport in safe way

The perfect form of securing your products inside a box is to place inside one of stabilising solutions. The most popular solutions are:
